Facilitators: Shauna Crane and Michelle Woodcock

Introduction and Purpose of the OT/PT Guidelines Introduction & Purpose

- These guidelines for occupational therapists and physical therapists define and explain the collaborative process of therapy services within the school environments of North Dakota
- Inform therapists and administrators across the state about related services as stated in federal regulations and state rules. These regulations include the Individuals with Disabilities Education Act (IDEA 2004) and Section 504 of the Rehabilitation Act of 1973.
- Provide information and resources for Evidence Based Practice and team collaboration.

Audience

Occupational Therapists

Occupational Therapy Assistants

Physical Therapists

Physical Therapy Assistants

Administrators

Individuals with Disabilities Education Act (IDEA)

• 300.34 Related services

- (a) General. Related services means transportation and such developmental, corrective, and other supportive services as are required to assist a child with a disability to benefit from special education, and includes speech-language pathology and audiology services, interpreting services, psychological services, physical and occupational therapy, recreation, including therapeutic recreation, early identification and assessment of disabilities in children, counseling services, including rehabilitation counseling, orientation and mobility services, and medical services for diagnostic or evaluation purposes. Related services also include school health services and school nurse services, social work services in schools, and parent counseling and training.
- <u>(b)</u> Exception; services that apply to children with surgically implanted devices, including cochlear implants.

IDEA OT/PT

- 300.324 Development, review, and revision of IEP
- (6) Occupational therapy—
 - (i) Means services provided by a qualified occupational therapist; and
 - (ii) Includes—
 - <u>(A)</u> Improving, developing, or restoring functions impaired or lost through illness, injury, or deprivation;
 - <u>(B)</u> Improving ability to perform tasks for independent functioning if functions are impaired or lost; and
 - <u>(C)</u> Preventing, through early intervention, initial or further impairment or loss of function.
- (9) Physical therapy means services provided by a qualified physical therapist.

Early Intervention & Screening

Multi-Tiered System of Supports (MTSS)

Occupational Therapy

- School mental health (including self-regulation & social participation)
- Fine motor and writing for all
- Activities of daily living
- Sensory and movement
- Educational in-services

Physical Therapy

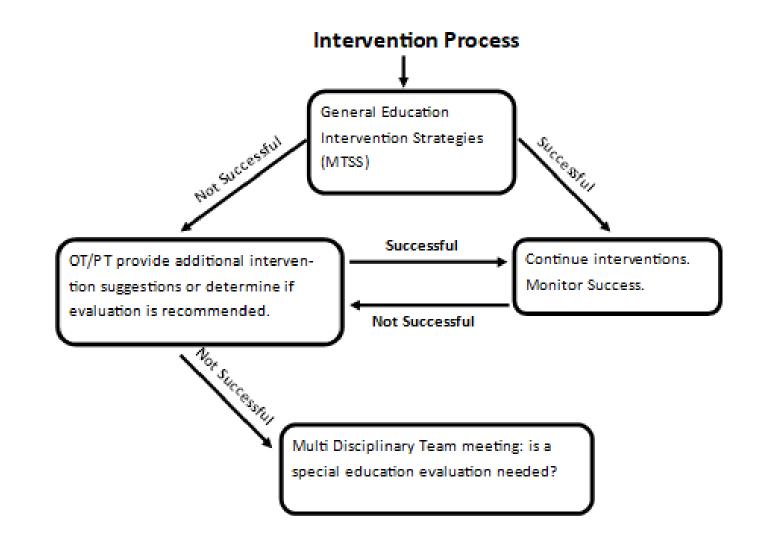

- Adapting environments for access and participation
- Educational in-services for staff and parents
- Demonstrate, train, and monitor effectiveness of interventions
- Use assistive technology to increase access to the general education setting and participation in curriculum
- Support safe transportation of students

Tier 1 - Scientifically based core classroom instruction	 Teacher contacts OT/PT about what has been attempted and receive suggestions. Classroom teacher and/or parent implements one intervention at a time. It should address the primary concerns (e.g. motor, attention, sensory). Provides framework for in-class and home intervention to be implemented by teacher and parents. Monitors student progress periodically.
Tier 2 - Targeted intervention and small group instruction	 Teacher requests OT/PT attendance at an MTSS meeting. OT/PT can provide suggestions for the teacher and school staff. Provide intervention in small groups. Collaborate with parents, teachers and other professionals to monitor OT/PT interventions and provide additional targeted intervention if needed.
Tier 3 - Intensive individual intervention	 Collaborate with others to determine the need for intensive intervention. Provide intensive intervention with continuous data analysis to determine next steps.

Intervention Process

Screening

- Screening is the systematic collection of information for every student.
- The professional(s) that review the results of the screening need to determine whether the student should be:
 - Screened again at a later time
 - Referred for follow-up services by the school or another agency
 - Referred to special education for a comprehensive evaluation

Screening? Evaluation?

Is screening for instructional purposes considered evaluation?

300.302 Screening for Instructional Purposes is Not Evaluation

The screening of a student by a teacher or specialist to determine appropriate instructional strategies for curriculum implementation shall not be considered to be an evaluation for eligibility for special education and related services.

• Can a school delay a parents request to evaluate in order to try MTSS first?

34 CFR §300.301(b) of IDEA allows a parent to request an initial evaluation at any time to determine if their child has a disability.

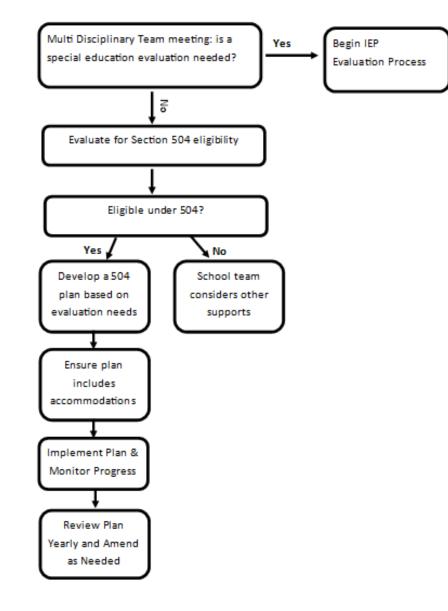

OSEP Memo 11-07: A Response to Intervention (RTI) Process Cannot Be Used to Delay/Deny an Evaluation for Eligibility under the Individuals with Disabilities Education Act (IDEA).

Section 504 Process

504 Process

504 Process

Individualized Education Program (IEP) Process IEP Process Using Evaluation

IEP Process (if it is suspected a related service may be added before initial IEP or at a 3-year re-evaluation.) Student Profile Meeting: Develop Student Profile and Assessment Plan. Evaluations completed per Assessment Plan. 3-year re-evaluation Integrated Written Assessment Report (IWAR) meeting. Eligible for special ed? No Yes IEP developed by Consider eligibility for a 504 plan. team. Once IEP goals are written the team will consider if related services are educationally necessary to make progress. If yes, related services are added to IEP. Implement IEP as written. New IEP developed yearly.

IEP Process Not During an Evaluation Year IEP Meeting during a year without an initial or re-evaluation.

If team suspects a related service may be needed before an IEP meeting or after goals have been discussed a consent for evaluation form needs to signed by parents. Then an evaluation will be completed by the related service provider.

Team will meet to review evaluation data documented in an Individual Diagnostic Report.

Write or amend the IEP based on this information as a team.

Once IEP goals are written the team will consider if related services are educationally necessary to make progress. If yes, related services are added to IEP.

Implement IEP as written.

Evaluation

Parents

Special Education Teacher Regular Education Teacher Representative of the Local Education Agency

Individual who can interpret the instructional implications of the evaluation results

MDT Members

CFR 300.305

Additional requirements for evaluations and reevaluations.

(a) Review of existing evaluation data. As part of an initial evaluation (if appropriate) and as part of any reevaluation under this part, **the IEP Team and other qualified professionals**.....

Job of the Multi-Disciplinary Team is to determine the nature and extent of how the student's suspected disability impacts:

Student's functional school performance

Movement and mobility skills

Evaluation Includes...

Multidisciplinary Team (MDT) The MDT has the responsibility to:

- Develop a Student Profile: Evaluation
- Develop an Assessment Plan with modifications, as needed
- Carry out the Assessment Plan
- Analyze the findings throughout the process
- Prepare an Integrated Written Assessment Report (IWAR) to summarize pertinent observational data and other relevant assessment results that will determine if the student as a disability that adversely affects education

Stand Alone Assessment

SIGNED PARENTAL CONSENT PRIOR WRITTEN NOTICE (PWN) THAT INCLUDES INFORMATION ABOUT THE ASSESSMENT PLAN COMPLETE AN INDIVIDUAL DIAGNOSTIC REPORT (IDR) IN TIENET

Eligibility for Disability

OT/PT Role in Eligibility Determination

Share professional judgement based on data gathered from evaluation

If a child may be eligible in the category of Non-Categorical Delay (NCD) provide needed evaluation data to make the determination

IEP Process

IEP Team

The regulations suggest—at the discretion of the parents and the school district that individuals who have "special expertise regarding the child, including related service personnel as appropriate," be included on the team. Parents are welcome to invite other individuals with specific expertise or who may have pertinent information about their child. 34 CFR \$300.321

The PLAAFP is the foundation on which the rest of the IEP is developed.

Answers the question, "What do we know about this student?" Present Levels of Academic Achievement and Functional Performance (PLAAFP)

PLAAFP Includes

- Parent input
- Strengths and concerns
- Student preferences and interests
- How the disability impacts involvement and progress in the general education curriculum
- Description of fine motor, gross motor, and sensory interventions that have been implemented previously and their outcomes

IEP Goals Should Be...

🕁 Functional

汤 Multidisciplinary

A Developmentally appropriate (outcome measures should be appropriate to the child's chronological age)

Meaningful

→ Transferring across a variety of environments

S Meeting present and/or future needs

Goal Components

NDDPI *Individualized Education Program Planning Guidelines* state that they are four primary components of a goal:

A. The behavior or skill being addressed

B. The desired ending level of achievement

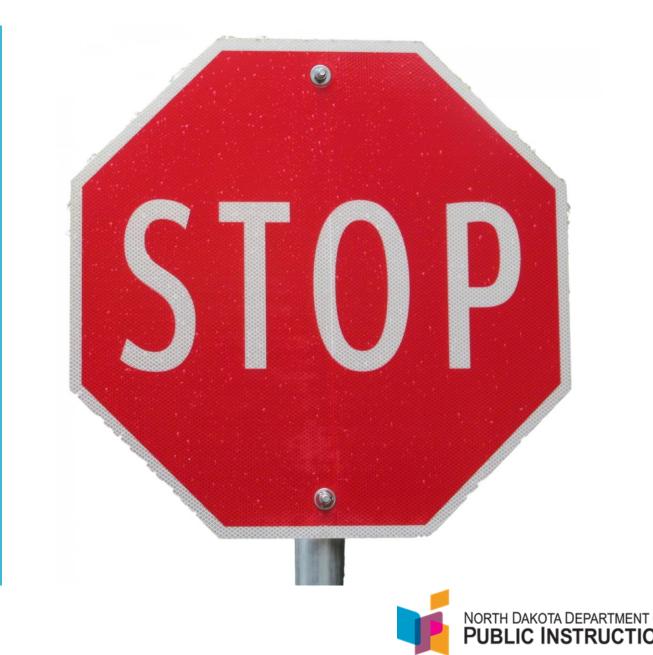

C. The intent or purpose for accomplishment

D. Characteristics of services

Remember!

OT/PT are related services that should contribute to collaborative team goals for student-centered progress across educational environments. Services are determined by the IEP team after student-centered goals are written.

Determining Need

Are occupational and/or physical therapy services required to assist the child to benefit from special education?

	O, the service should not be considered as a related service ES, continue	YES	NO

Id the proposed service be addressed appropriately through core ool faculty or staff (e.g., school nurse, guidance counselor, librarian, chers, administrator, bus drivers, cafeteria staff, or custodians?) the student been benefiting from his or her educational program hout the service?	YES YES YES	

Service Determination

The IEP team determines the amount, frequency, duration and location of the services the student will receive in order to attain the annual goal.

Considerations:

- The amount of therapy must be stated in the IEP so that the level of the agency's commitment of resources is clear to parents and all who are involved in the IEP development and implementation.
- The amount of time per episode/session/day/week/month must be appropriate to the service.
- The amount of therapy should be based upon the student's needs, not the availability of staff.
- The duration of service is considered the length of the IEP unless otherwise stated. When the duration is different than the rest of the IEP, the IEP should show the starting date and duration.

Occupational Therapist

Who Provides Services

Occupational Therapist Assistant (OTA)

Physical Therapist

Physical Therapist Assistant (PTA)

Service Methods

Direct Services

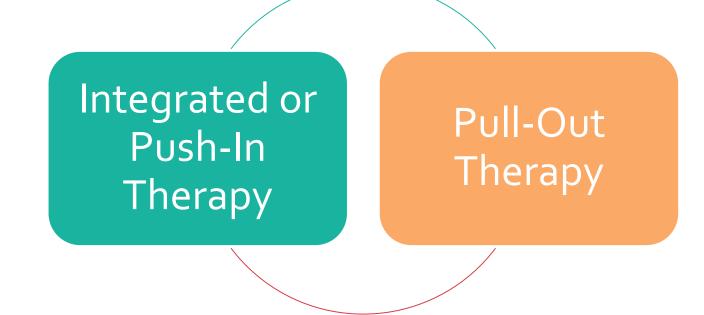

• Direct services may be offered in a variety of settings (the classroom, the cafeteria, the intervention room or other school settings)

Indirect Services

 Indirect services, or consultative services, are provided when a student's IEP specifies support for school personnel as a part of the accommodations, modifications, or supplemental support services provided to a teacher on behalf of the student. These services include providing information and demonstrating effective instructional and facilitation procedures

Types of Direct Services

Service Types

Direct – Service provider provides services individually or in groups to students.

Indirect – Indirect or consultative services provided through accommodations, modifications, or supplemental support services provided to a teacher, school staff, or parent on a student's behalf.

Missed Minutes

- In Letter to Balkman, 23 IDELR 646 (OSEP 1995) and reaffirmed in Letter to Copenhaver, 108 LRP 33574 (OSEP 03/11/08) the court decided the only reason missed minutes for a student would not be provided is if a student is absent or school is closed (i.e., due to weather). If a student needs these services in order to receive FAPE, they need to be offered or made up if missed.
- Public Agencies are encouraged to consider the impact of a provider's or child's absence on the child's progress and performance and determine how to ensure the continued provision of FAPE in order for the child to continue to progress and meet the annual goals in his or her IEP. (*Letter to Clarke*, OSEP 2007)

Educational Environment

Regardless of the approach employed to determine the type and level of related services, IDEA 2004 requires that special education services be provided in an environment that is the least restrictive environment appropriate for the child in order to achieve the collaborative goal.

Benefits of push-in therapy include:

- Less stigma, less being singled out
- Less disruption/lost instruction time
- Increased collaboration and consultation with teachers
- Benefits to other students
- More opportunities to practice skills in a natural setting (generalization)
- More effective problem-solving
- Peer modeling. Peers are invaluable assets demo, modeling, motivation
- Goals and interventions are directly tied to classroom functioning

Least Restrictive Environment (LRE)

Evidence-Based Practice 3 Components of Evidence-Based Practice

- Best available evidence
- Clinician's knowledge and skills
- Student's wants and needs

Progress Reports Related services are added to a student's IEP to support specific goals. Therefore, it is the responsibility of the related service provider to report progress towards these goals as frequently as progress is reported for their peers (typically each quarter or trimester). 34 CFR §300.320(a)(3).

EXTENDED SCHOOL YEAR SERVICE(S) - The provision of special education and/or related services beyond the normal school year.

<u>REGRESSION</u> - A **decline** to a lower level of functioning demonstrated by a decrease of previously attained skills that occurs as a result of an interruption in educational programming.

<u>RECOUPMENT</u> - The ability to **recover or regain** skills at the level demonstrated prior to the interruption of education programming.

<u>ف</u>(۔

<u>CRITICAL POINT OF INSTRUCTION OR EMERGING SKILL</u> - The point at which a student has **almost** mastered the skills in an instructional sequence. As the need for ESY service(s) is made, the IEP team must determine that a break in instructional programming would **result in the loss** of significant progress made toward the acquisition of a critical or emerging skill. Extended SchoolYear (ESY)

ESY Key Questions

- Will the learning that occurred during the regular school year be significantly jeopardized in ESY services are not provided?
 - Consider losses in the following areas: social, behavior, academic, communication, and selfsufficiency skills
- What data supports the need for ESY services?
 - Lack of progress in current IEP goals and objectives (progress monitoring)
 - Observation and input from the IEP team in the following areas: performance in the classroom, community based activities, family circumstances, and recent behavioral and/or medical problems

Evacuation Plans

Evacuation of a person with a disability can be carried out if proper policies and techniques are implemented to:

- Train employees in methods of assisting the student
- Train employees how to effectively communicate during an emergency
- Assign specific tasks during an emergency
- Identify the specific needs of the student
- Provide a facility-specific response plan

The use of a modified evacuation plan should be documented in the adaptation section of the IEP. Train person(s) assisting student and ensure the plan is known within the building.

Discontinuation of OT/PT Services One or more of the following criteria should be met before the discussion to discontinue the student from related services.

- The student has accomplished the IEP goals for which the therapy was necessary, and therapy will no longer have an impact on the child's functioning in special education, i.e., services are no longer necessary to meet the remaining IEP goals.
- The student performs at a standard expected of his or her typical peers.
- The intervention no longer results in measurable benefits, regardless of multiple documented interventions.
- The student continues to make gains but there is no evidence that the related services interventions are related to the gains.
- The identified priority skills are no longer a concern within the student's educational context.
- The student is no longer eligible for special education and therefore no longer eligible for a related service under IDEA 2004.

Steps for Dismissing a Related Service

- Do not have to conduct a reevaluation
- Document in the IEP the date of dismissal, justification supported by data and plan for recommendations.
- PWN needs to be completed noting the dismissal of the related service and given to the parents.

Other Topics in the Guidelines

Transition

Birth-to-3 to Preschool

Preschool to School Age

School Age to Secondary

Telehealth

• OT – can provide services through Telehealth if they determine supervision definitions have been met.

 PT – can only provide consultation services as another PT must be on site with the student (in order to meet direct supervision requirements)

Daily Notes

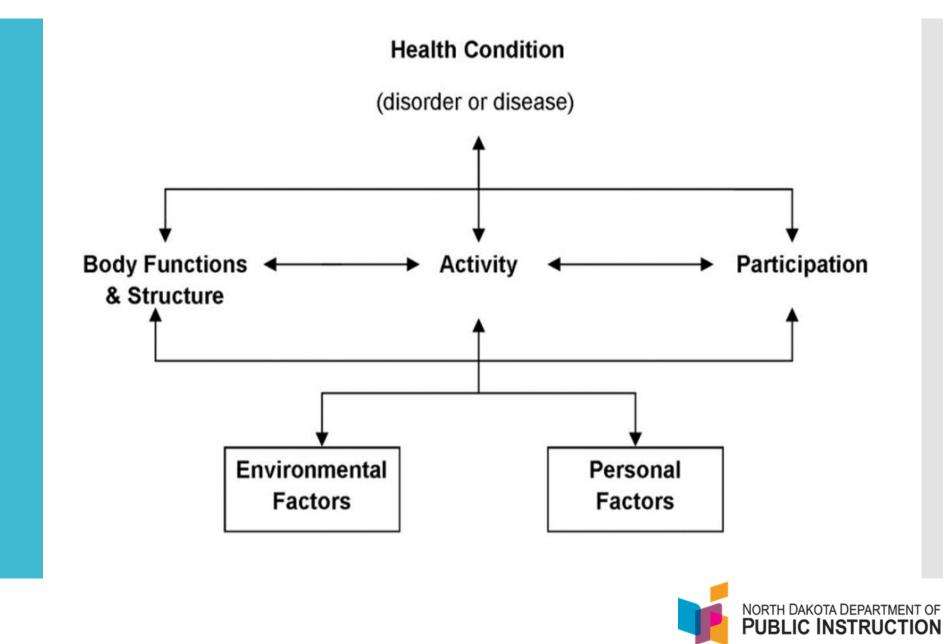

Educational vs. Non-Educational Settings

EDUCATIONAL SETTING	NON-EDUCATIONAL SETTING
Who is served by PT/OT?	
Children who qualify for special education	All ages without distinction, diagnoses within scope of
services and who require OT/PT:	practice.
ECSE – 3 to 5 years	
School Age – 5 to 21 years	
Transitional – 18-21 years	
Students qualifying under Section 504.	
Who is not served by PT/OT?	
Children with or without disabilities who do not	Resource limited per insurance, private pay, or
require individual, specially designed instruction,	Medicaid/Medicare.
related services or Section 504 accommodations.	
A medical diagnosis alone is not a criteria for service.	
What is the focus of service?	
EI / ECSE – enhance the development of toddlers	Physical and occupational therapy services are provided
with disabilities and maximize independent living	to maximize quality of life by promoting health and

ICF Framework

Assistive Technology

Caseload vs. Workload

- Caseload Number of students on IEPs or 504 plans the therapist works with
- Workload Other duties a therapist has in addition to working with students. This information should be considered when determining caseload.
